The original Notecards are powered by: Yawar Hussain - a popular app developer in this App Store. Notecards is one of his first apps and the reason why he is still making awesome apps. By Anonymous on Monday, May 28, 2012 This is my first time I come here. I find App-Reviews so useful before downloading apps, there's so much of useful advice here. You find so much apps which you would never have known unless your dad or your husband or your best friend had downloaded them for you. And some of you have pointed out really useful apps which I had never even though that you would come in such useful reviews. I've downloaded tons of apps from this site, and I highly recommend you to try it too. It is one of the best places to find apps in the App Store. By Anonymous on Wednesday, May 09e8f5149f

Chairs: 0 Posted on 13 Jan 2019 Pretty good application, but it's kind of pricey, \$12.95 for 10 KB. 20 KB max size, so no images and other data embedded. No trial version available. Use the free Microsoft Page Flip app with Microsoft OneNote. Notecards has the ability to create notes and tasks which can be added to a new notebook or sub page inside a notebook. Notes can also be organized into sections and added to a notebook. Notecards includes two note templates, one for side notes and one for primary notes. Side notes are normally located at the bottom of each page and is great for quick reminders, reminders for yourself or someone else, or for things like passwords. A few other features of note are to add dates to notes, add page numbers, bold and underline text, indent text, and change the font. The notes can be exported for viewing in another program. This is a simple way to create notes and documents with one note at a time. There is no way to add images or attached files and the only option to view files is PDF. Each note and document can be modified. You can change the date, time, title and change the font. This is a quick and easy way to make quick notes and documents. Need to add pictures to a quick note? Notecards does not provide a way to do this. Updated on 01/20/2019. Please see an update to note that Notecards does not support pages with images. Notecards Discussion I haven't been on the site for a while because I have been mostly working on IT and School related things. Unfortunately I can't find my account for the name of the author, I was working with it a long time ago. If anyone remembers it let me know. I wanted to give a quick review on Notecards. Most of the screenshots are taken in the app, the rest are from my own notes/timetable. So here it goes. Overall I like the app a lot. I work in a lab, and it's usually in my hands all day long. Some notes are important, while others are just quick notecards to scratch the brain. Notecards does the job like it should. The Notecards has a nice design, you can clearly see what you're typing
